

Science Outreach – Athabasca presents... *Living with Artificial Intelligence: past, present and future.*

Speaker: Dr. Stella George
Assistant Professor, Computing and
Information Systems, Athabasca University
Date: Wednesday, September 25, 2019
Time: 7:00 PM to 8:30 PM
**Place: Athabasca University
Governing Council Chambers**

Over the last five or so years Artificial Intelligence (AI) has erupted in our media. Would it surprise you to know AI has been around since the advent of the computer at the end of WWII? And it has quietly been evolving ever since. The term AI is used by the media ubiquitously but what actually is included under the umbrella term AI?

We all know AI is coming, but do we realize quite how much it is already here? Do you use a GPS? Have you fought with Siri (Apple) or Alexa (Amazon), Cortana (Microsoft) or Bixby (Samsung) to be understood! Maybe you have ridden the autonomous transit between the Science Centre and the Zoo in Calgary?

Join Stella in considering fundamental questions about AI that will help you feel more confident about living with AI and asking questions of organizations who use AI.

Free community event! Refreshments & Door prizes!
