Welcome the arrival of spring with a presentation on amphibians, a truly springtime group of creatures. Learn about their ecology, behaviour, and how the health of amphibians can be an indicator of the health of their wetland homes. We will also touch on identifying amphibians in the Athabasca area by sight and sound. We don't have a lot of species in our part of the world, but the ones we do have are tough, intriguing and worthy of respect. I hope you can attend!

Free community event! This event may be recorded.
