

*Science Outreach – Athabasca
presents...*

A History of Lake Management in Alberta and the Lakes of Athabasca County

Speaker: David Trew

Executive Director of the North Saskatchewan Watershed Alliance

Date: March 15, 2016

Place: Athabasca University

Governing Council Chambers

Time: 7:00 to 8:30 PM

*Sponsored by Science Outreach – Athabasca and
Baptiste and Island Lakes Stewardship Society (BAILS)*

The climate and geology of Alberta have created a complex physical setting for the province, giving rise to a diverse range of landscapes, ecological regions and water resource characteristics. Alberta lakes are equally diverse in terms of their physical, chemical and biological conditions. Their long-term management needs have been the focus of much public and scientific interest in recent decades. This presentation will include a brief overview of lake characteristics, research and management highlights, and the knowledge base available to us today. Some discussion of future management needs will also be provided.

***Admission is free. Door Prizes!
Refreshments will be available for this presentation.***
