Love Under the Northern Lights

**Speaker: Martin Connors,
Professor of Space Science and Physics at
Athabasca University's Centre for Science**
Date: Thursday, February 14, 2019
Time: 7:00 PM to 8:30 PM
**Place: Athabasca University
Governing Council Chambers**

The northern lights or aurora holds many scientific mysteries. But what feelings come from watching them? This Valentine's Day talk will first explore whether the northern lights are romantic. Then we will look at their role in cultures around the world, from expected places like Canada and Norway, but surprisingly ranging down to Rome and Cuba. Do we need to fear the northern lights? Finally, can we hear the northern lights, or conversely can we affect them? The presentation will be suitable for all ages, but does allude to reproduction. A telescope may be set-up outdoors after this presentation if the weather permits for those interested in viewing the night sky or feel free to bring your own telescope. Please dress appropriately for the weather!

Free community event! Refreshments & Door prizes!
