Forget the cold of winter for awhile and take a photographic visit to a variety of gardens from Southeast Asia and from North America. Dr. Holmberg is a retired biologist of Athabasca University who has a fondness for gardens, especially Japanese and other oriental gardens. He has visited and photographed over 30 oriental gardens in Japan, Hong Kong, Singapore, Thailand, and Indonesia, as well as across Canada and the United States. During this presentation, he will outline four major components of oriental gardens: plants, water, rock, and architectural structures (e.g., gates, pavilions, pagodas). Please join us from the comfort of your own home or wherever you may be!

Free community event!

Events may be recorded. To view the recordings, please feel free to [visit our YouTube Channel](#) or go to our [Science Outreach - Athabasca website in Past Events](#).
