We live in the Boreal Forest - the world’s largest terrestrial ecosystem. Albert Karvonen will discuss the diversity of life in the “our” forest and show a 46 minute film, “Spirit of the Forest”, that was created in the County of Athabasca. When a person spends half his/her life in a forest, the forest becomes part of the person. Join filmmaker Albert Karvonen as he explores his beloved forest surrounding his country home, where all creatures, including humans, are interconnected.
