

Science Outreach – Athabasca presents...
“Alberta's Carbon Market - How it works & opportunities with tree plantings and agroforestry.”

Speaker: Kerrienne Koehler-Munro & Doug Macaulay of Alberta Agriculture and Rural Development

Date: Tuesday, November 23, 2010

Place: Athabasca University Governing Council Chambers

Time: 7 PM to 8:30 PM

During the last decade a new market has started to develop around the world. It is partially in response to the Koyoto Protocol that looked at ways the world can tackle climate change issues. Carbon Credits are one of these systems that are being used. These credits also known as Carbon Offsets are now being traded around the world including Alberta. So far this has been of benefit to many farmers across Alberta to diversify there incomes. Today there are many new opportunities for landowners regarding the production of Carbon Offsets; one such opportunity may include the planting of trees. Come learn a little more about carbon offsets and tree crop and how they relate to the climate change solution.

Refreshments. Draws for prizes. Admission is free.
