

**Science Outreach – Athabasca
presents...
“Mollusks: snails, clams
and squids”**

Speaker: Robert Holmberg
Date: May 30, 2013
Place: Athabasca University
Governing Council Chambers
Time: 7:00 PM to 8:30 PM

Refreshments will be available after this presentation.
Admission is free.
Door Prizes!

Mollusks are soft-bodied animals, but often with shells, that mainly inhabit the oceans. However, even in land-locked areas, such as Alberta, there are some interesting native mollusks. Moreover, we find many mollusks in our grocery stores as well as in various jewelry and other decorative objects. This talk will open up the world of mollusks to both children and adults. There will be many mollusk shells on display and the refreshments will feature mollusks. Come and learn about the second most diverse group of animals in the world. Robert Holmberg is an invertebrate zoologist, who is an Emeritus Professor at Athabasca University.
