

Science Outreach – Athabasca presents...
**“Invisible Domains: the world
under a microscope”**

Speaker: Dr. Roland Treu
*Associate Professor of Biology in the
Centre for Science,
Athabasca University*

Date: February 27, 2014

Place: Athabasca University
Governing Council Chambers

Time: 7 PM to 8:30 PM

Refreshments will be available after this
presentation. Admission is free.
Competition for Prizes!

The invention of microscopes early in the 17th century started a new chapter in our understanding of the world. In this presentation, we will see examples of the fascinating world that opens under a microscope. A brief history of microscopes will be followed by a look at the optics that make a microscope work. We will also cover electron microscopes and microscope sample preparation. Examples of images of various organisms and objects under the microscope will be viewed. After the talk, a demonstration of various microscopes from the Athabasca University Centre for Science will be provided and there will be an opportunity for the audience to glance through some microscopes.
