Time: 7:00 PM to 8:30 PM

Place: Athabasca University

Governing Council Chambers

<http://digiport.athabascau.ca/karvonen/about.php>

Join Albert & Pirkko Karvonen on a journey through Tanzania and Kenya as they discuss their film Journey will also have a short discussion on the affects of climate change. This film focuses on one of the great spectacles of nature, the wildebeest migration of Tanzania and Kenya. It is the longest single migration of any land animal on earth, over 1600 kilometers. Beginning in January at the southern tip of the unique Serengeti Plains. We follow the 1.5 million wildebeest and their fellow travelers; zebras, antelope, and others, to their final destination across the Mara River to the grasses in the Masai Mara National Park in Kenya. With this large contraction of prey there are also numerous, ever-hungry predators; lions, cheetahs, hyenas and of course the scavengers, for nothing in nature is wasted. Along the way you will also meet and experience the friendly, colorful and beautiful people and their culture.

Free community event! Refreshments & Door prizes!
